

Travel Smart!

- Know what to expect before traveling. Airlines have specific travel guidance and tips on their websites. Your airline will also have the most up-to-date flight information concerning any delays or cancellations.
- Make sure all straps are inside your suitcase or firmly secured and all pockets and zippers are closed. Please remove old luggage tags and bar code stickers.
- Take any medications, jewelry and other valuables in your carry-on luggage.
- Remove belts and all personal items from your pockets, such as wallets and keys, before entering the checkpoint queue and place them in your carry-on bag. Place all food items and electronics larger than a cellphone in a bin for security screening.
- Check the TSA website (tsa.gov) for information on restricted articles in checked and carry-on baggage.
- Observe the 3-1-1 liquids rule – No more than 3 ounces of liquid per container, all must fit into 1 quart-sized bag and only 1 bag per passenger.
 - TSA allows one liquid hand sanitizer container, up to 12 ounces, per passenger. This will need to be removed from your bag for screening.
